

THANK YOU FOR VOTING US BEST ORTHOPEDICS!

Dr. Toulson is a board-certified, fellowship trained orthopedic surgeon with Alpha Orthopedics located in McKinney at Craig Ranch. He has comprehensive knowledge of orthopedics that arose with his training at John Hopkins, the number one ranked hospital in the United States. In addition, he has been trained specifically in joint replacements and revisions at the Hospital for Special Surgery in New York again one of the top orthopedic programs in the country. Dr. Toulson created the first Joint Replacement Center of Excellence in Collin County, which received the Joint commission's Gold Seal of Approval for health care quality and has recently established a second Center of Excellence also in Collin County.

Dr. Toulson is particularly known for being the leader in robotic-assisted hip and knee joint replacements. The robotic-assisted technology allows for considerably greater accuracy and precision of the new joint placement. He has performed more robotic joint replacements than any other surgeon in Texas. Currently he is the only surgeon in Texas performing robotic-assisted hip replacements in combination with the Anterior Supine approach. This minimally invasive approach allows him to reach the hip joint from the front of the hip without cutting vital muscle structures to minimize pain and increase recovery time. This surgery is so effective that in most cases patients are walking the very next day. At Alpha Orthopedics we stand behind our motto as being "The Future of Arthritis Care"

Alpha Orthopedics also provides care for full range of musculoskeletal disorders, diseases, and injuries. As well as hip and knee reconstruction, adult hip and knee revision, sports medicine, knee arthroscopy, shoulder, elbow, foot, and ankle trauma.

Dr. Toulson's education and training is only outmatched by his compassion and kindhearted nature, which extends to his entire staff. At Alpha Orthopedics, every patient is considered part of the family.
